

LET'S STOP THE THERAPEUTIC PRODUCTS BILL

The Therapeutic Products Bill is intended to replace the Medicines Act 1981 and the Dietary Supplements Regulations 1985. If passed, this bill will lead to the destruction of our food and natural medicine supply.

Therapeutics were NOT included in previous iterations of the Bill and assurance was given that they wouldn't be.

If this Bill is passed, natural health products such as vitamin and mineral supplements, herbal remedies, animal extracts, probiotics, enzymes, and essential fatty acids **will be regulated**.

Your own doctor may be gagged and unable to recommend something natural to complement other treatments.

This bill also covers gene therapies, advanced cell and tissue therapies; medical devices that are software, production systems, whole organs and tissue grafts.

**NEW ZEALANDERS MUST MAKE THEIR VOICES HEARD
BEFORE SUBMISSIONS CLOSE ON MARCH 5TH 2023!**
